|                                                                                                                                                                                                                                                                |       |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------|
| Chemical Composition By Gc-MS And $^{13}\text{C}$ NMR Analyses Of<br>The Constituents Of The Essential Oil From The Leaves<br>Of Piper Guineense Schumacher & Thonn. From Côte<br>D'Ivoire: Predominance Of Hydrogenated Azulene<br>And $\beta$ -Caryophyllene | 01-08 |
| Phytochemical Profiling And Assessment Of The Therapeutic<br>Prospects Of Saraca Asoca                                                                                                                                                                         | 09-12 |
| Adsorption Study Of Methylene Blue Dye Using Banana<br>Peel Derived Activated Carbon: Isotherm And Kinetic Modelling                                                                                                                                           | 13-14 |
