Contents:

- Feature Extraction Using Hexagonal Pixel and Scale Invariant Feature Transform in Ornamental Letter Recognition
- A Survey of Imperfection of Existing Recommender Systems for Academic Fraternity
- Voice Controlled Home Automation Using Amazon Echo Dot
- Cyclamate Complexity Analysis of Boundary Iterative Deepening Depth First Search (Bides)
- New Age Tourism Guidance with Travelling Salesman Algorithm Using GPS - Enabled UAVS
- Web User Revisitation Relevance Feedback Using Keyword For Web Mining
- New Credibility Inspection Operation For Evaluate Data On Twitter Using Latent Dirichlet Allocation Model
- “Implementation of Secure and Reliable Routing Methodology for WSN”
- “Artificial Intelligence and a Creative Mind”
- Detection of Abnormal RBCs using Signatures
- Ranked Cluster Based Adaptive Sampling with Gradient Boosting Classifier for Medical Data
- A Multimodal Approach To Enhance The Performance of Biometric System
- IoT Based Smoke Monitoring
- Hybrid throughput aware variable puncture rate coding for PHY-FEC in video processing
