

Social Anarchism Analysis of Gang Motor To Minimize The Conflict Juvenile Delinquency In Makassar

Nursalam

Sociology Department, Universitas Muhammadiyah Makassar

Abstract The purpose of this research was to determine the background of gang motor anarchism in Makassar and to minimize the problem about gang motor anarchism that always unsettling and threatening the safety of Makassar society. The method that used in this research is a descriptive qualitative method. Descriptive research is "research that to describe a condition or phenomenon, not sorting out or searching for factors or certain variables. Crimes by gang motor made disturbing for the society. Anyone who is involved in it, whether apparatus or not, the anarchy was taking the life of a criminal action that has been intolerable. Indirectly, this issue has an adverse effect on the next generation of education based on explanation, we can conclude that the gang motor has existed and flourished in Makassar and it becomes part of Makassar and is a phenomenon that must be observed by the government for all of the communities (including gang motor as the punk culture) can be embraced so that it can be active in the development activities. Basic fundamentally of gang motor is starting from the wild rice. Some groups feel not accept the defeat then provoking the use violent. Wild racing action has been started since the 90th and glow was began in 2010th. There is 10 gang motor in Makassar they are Mappakoe, Lontara, Sekicol / Skejol, Tetta, Black Pepper, May in Moral, Lightning, Copergo, Cooper, Stone Lase. Makassar society was troubled by gang motor. Several targets, such as Alfa Mart, Indo Mart and the other and the accident was done at night. In additional case theft and murder.rice according to Deputy Chief of Police Criminal Investigation Unit of Makassar, Commissioner Anwar Hasan that The emergence of gang motor in Makassar started from the wild beginning of a wild race and They use this case to recruit the members. There were some factors as background Gang Motor in Makassar like education, environment, age, role of media, and distribution and population density

Keywords:- *social dimension, anarchism, motorcycle gangs and juvenile delinquency*

I. INTRODUCTION

Population density and population development make some not only cleanliness of the environment but also social problems. Gang motor is one of the social problems which disturbs the society. Gang Motor is very dangerous because they trouble the society by using some tools to make injure and make use a people feel anxious especially at night. The ironic case that most of the gang motor members are young people which still sitting at elementary school. The average age of them between 14th to 16th years old. The member of this community famous with a bad attitude, affection, brave to perform an action without any fear at all, including the police. With a bow (slingshot iron and nails) and other sharp weapons, they spread threats and act brutally without good care. Even though the police already give the announcement to shot but they did not care about that.

in social case problems Juvenile delinquency can be categorized into deviant behavior. Perspective by deviant rule behavior occurs because there is a social problem of deviant behavior of various social rules or social norms. Deviant rule of behavior can be regarded as the source of the problem because it can harm the establishment of a social system. The use of the concept of deviant behavior implicitly implies that there is a path that must be taken raw. Behavior through the pathway means has deviated including gang motor that makes uncomfortable for the society for this time.

Gang motor issue is a very urgent issue because it involves the future of our young generation. Therefore, all parties had to intervene to resolve the issue. Anarchism is not the solution but the persuasive approach is needed. To overcome these problems required problems with various backgrounds teenagers who are members of the community. Problem analysis is needed to know to the group of society. those in the social world so that these problems can be overcome and can find a way out to accommodate adolescents in Makassar that problems of gang motor that had been troubling can be solved their interest towards more positive because they are our generations, With studies and analysis obtained, will be concluded a gang motor problem can be solved by good funding and attention.

Changing of Social lifestyle from time to time, it is a phenomenon and natural thing an inter-community life before and after knowing newspapers and objects that shaped modern. Changes that occur can progress and could even reverse, which is called the setback. Society elements that the typically recognize changes in social

values, social norms, social patterns, social organization, social institutions, social stratification, social power, responsibility, leadership and so on. Social change is the change of the structure and function of social philosophers, scholars of sociology and even economics they say social change is a reasonable form, arising from the association of human life. Some social expert opinion says that social change because a change in the elements that retain primary society and social conditions of society.

Expert opinion of Gillin and social change of ways of life that have been received is a variation, which is caused because changes geographic, cultural, population, composition, and so forth.

Juvenile delinquency covers all behavior that deviates from the norms of criminal law committed by juveniles. Such behavior will harm himself and those around him. Education experts agree that teenagers are those aged 13-18 years. At that age, a person goes beyond childhood but is still not mature enough to be considered an adult. In his transition. Juvenile delinquency is referred to as Juvenile delinquency is evil behavior (worthless) or evil young children. Youngster's evil also known as socially handicapped children. The juvenile is derived from the Latin language "Juveniles", that the meaning children, young people, the characteristic features in adolescence and Delinquent derived from the Latin word which means neglected, ignored, which then expanded again means to be evil.

According to the experts, Definitions of juvenile delinquency are:

1. Kartono (2007, sociology scientists)

Delinquency or in English was known by juvenile delinquency is a social pathological symptoms in adolescents caused by a form of social neglect. As a result, they developed a form of deviant behavior ".

2. Santrock (Kartono, 2007)

"Juvenile delinquency is a collection of various adolescent behaviors that are not socially acceptable to occur criminal acts." the obligation for parents to know what the Teenagers problems are. with this knowledge, parents can guide their children by good way. This is particularly felt by all on the shoulders because today's youth is a moral responsibility as a generation, replacing existing generation. These were the later role as a strong human resources and quality, hope in the global competition it can became a national asset and the nation's best n, which is certainly increasingly frenzied in the XXI century.

In his writings, Gumarso (2005: 19), said that, from a legal perspective juvenile delinquency are classified in two groups with regard to the norms of law, namely:

1. Delinquency who are immoral and socially, and not ushered in legislation that cannot or difficult to be classified as a violation of law
2. Delinquency that is breaking the law by settlement in accordance with the laws and regulations that apply equally to both illegal when performed adults.

According to its shape, Sunarwiyati S (1985) divided into three levels of juvenile delinquency;

1. Ordinary Delinquency, such as a scrappy, like wandering, ditching school, left home Without saying goodbye
2. Leading Delinquency to the violations and crimes such as driving without a license, taking things a parent without permission.
3. Special Delinquency such as substance abuse, sex outside of marriage, rape and others. The above categories are used as a measure of juvenile delinquency in the study.

II. RESEARCH METHODS

The method used in this research is a descriptive qualitative method. According Zulganef (2008) Descriptive is "research that to describe a condition or phenomenon, not sorting out or searching for factors or certain variables." Exposure research is intended to describe things that are asked in the research, such as: who, what, when, where and why "(Hussein, 2002: 40). This descriptive designs generally we can use the case method, follow-up, content analysis, trends or correlation (Hussein, 2002).

Consumer Problems is intrinsically holistic problems, complex and dynamic (Sugiyono, 2007) so to be able to understand more deeply and find patterns, hypotheses and theories then qualitative methods used in this study. Through qualitative methods of data obtained will be more complete, in-depth and detailed so that the research objectives can be achieved. The data is not visible to the senses, which can be obtained through qualitative methods, it will be difficult to express through quantitative methods of empirical, measurable and rigid (Sugiyono, 2005). Lancaster (2005) explains that sometimes quantitative and qualitative methods can be touching and the difference between the two is not specific. Qualitative data can indeed be quantified but in much social science research project, an attempt to change the data into numbers despite allowing to reduce the potential wealth of the study (Lancaster, 2005). In qualitative research, the sample is referred to as resource persons, participants or informants (Sugiyono, 2008). Furthermore, Sugiyono (2008) explains:

"Samples in qualitative research, nor is called a statistical sample but the sample theoretical because the purpose of qualitative research is to produce a theory. Samples in qualitative research also referred to as sample

constructive, because the source data from a sample that can be constructed initially phenomenon is still unclear. In this research, the sample is an area that the gang motor was grown by the young teenager. The selected sample divide into two sub-districts Tamalate and Rappocini districts. The area was chosen because, according to police data document, most teenagers were arrested domiciled in both these districts. The number of samples each district including parents in these districts. The number of samples is considered adequate if it had been up to the level of "redundancy" when the next sample will give new information (Sugiyono, 2005). By doing research, the focus of the researchers, in this case, is a full acquisition of the obtained information.

The process of data Collection in this research using and combining more than one different techniques for the validity sake of the obtained data (Lancaster, 2005). There are three kinds The technique that was used in this research, namely:

1. Literature Data collection

The first done through literature studies to reveal the theories that are relevant to the research topic. Theory and the results of previous studies by experts analyzed and presented to outline the research topics that will be studied.

2. Interview

data collection technique with interview allows researchers to investigate the perceptions and perspectives of informants (Daymon and Holloway, 2008). Type of interview that was used in this study is a semi-structured interview or interviews focused. The questions prepared before the interview guide with a focus on the issues discussed but can develop in accordance with the response of the informant. Questions - questions that was used in this study can be found in the appendix at the end of this report.

3. Observation

Observation is to collect data directly from the field by relying on observations of researchers (Semiawan, 2007). Observation requires systematic recording and recording information about an event, artifacts, and behaviors of informants that occur in certain situations, they not remembered, retold, and generalized by the participants themselves (Daymon and Holloway, 2008). Because there is a difference between what people say with what actually happened, the observation is used as a comparative tool that can confirm or refute the statement of participants. This type of observation conducted by researchers is participant observation. The type of participation used is passive participation (passive participation) where the researchers came to the place where the object of conduct but does not participate conducting such activities.

III. FINDINGS

3.1. The results achieved

a) Basic fundamentally of gang motor in Makassar

in the past of time Makassar is comfortable city . the visitors from other region of South Sulawesi, said that Makassar is a good city. But for this time a criminal action give disturbing to the society until dangerous level. That is, a number of innocent citizens should be dying, as a result of group's brutal action of teenagers armed with bows.

Brutal action of a group of motorcycle riders has become a phenomenon in Makassar. Quite disturbing indeed even invites fear. The Pattern about the criminal act was targeting road users at night. Especially, if the potential victims off guard. Acting had not fad anymore. They did not hesitate to persecute victims. According to Deputy Chief of Police Criminal Investigation Unit of Makassar, Commissioner Anwar Hasan Basri fundamentally of gang motor in Makassar star from wild rice and they used this case to recruit the members. (Tempo, 2013). One of the witnesses it had been interviewed in illegal racing shootout defeat in the race to say that provoke resentment between groups of motors. Each group competed to be the best among connoisseurs of illegal racing. For those who felt not accept with the result of rice then provoking the use of violent means. This is one of the trigger motorcycle gang in Makassar. Wild racing action had been around since the 90s but started to bloom again the case began in 2010.

for this time Makassar gripping by criminals of *gang motor* that include a sharp weapon such as stunned or bow made from iron or sword wheel their bike facilitate by tool to known it is gang motor that have spread in every corner of the city. Their General focus was for destroying people. Both the young and old can become the object of radical movement actors of gang motor for anarchist action. . Several target, such as Alfa Mart, Indo Mart and the other and the accident was done at night.

b) Sub Community *gang motor* in Makassar

Sociologically, a subculture is a group of people which behaviors and beliefs that are different from their culture. Subcultures can occur because of differences in the age of its members, race, ethnicity, social class, or gender, and can also occur due to differences in aesthetic, religious, political, and sexual; or a combination of

these factors. Members of a subculture usually show their membership with lifestyle or certain symbols. Therefore, the study of subculture often includes the study of the symbolism (clothing, music and behavior of members of sub-cultures) and how these symbols are interpreted by the parent culture. A subculture is always present in a particular time and space; it is not a phenomenon that was born with it. Her presence will be intertwined with other events into context.

Now there are eight anarchists gang motor that famous in Makassar. They are Mappakoe, Tetta, Kopergo, Lightning, Inmoral, Black Pepper, Lontara, and Stone Lase. In its action motorcycle gang always acting brutally ranging from robbery and looting mini market, a war between groups, and so forth. The average age of them were teenagers. Recruitment motorcycle gang is structured, then indoctrinated. This exceeds the limit of delinquency that leads to crime (Rakyat SulSel, 2014).

According to another source (Tribun news, 2014) there were nine motorcycle gangs who often act in Makassar, as obtained from Polrestabes Makassar. Their brutal acts of causing not a few lives. Ninth motorcycle gangs are (1) MAPPAKKOE by the leader Mangala Ari Katombocomes from Makassar (2). LONTARA by the leader ardiansyahHusrahor another name Daddi (20),with address Pioneer Independence 8 number 58, District Tamalanrea, Makassar (3) SEKICOL OR SKEJOL leaders still wanted (4) TETTA chairman by Irwan Come from Bontoala, Makassar (5) BLACK PEPPER (6) MAY IN MORAL (7). HALILINTAR (8). COPERGO (9). COOPER. Based on this information it can be concluded that there are at least 10 motorcycle gang sub community in Makassar is Mappakoe, Lontara, Sekicol / Skejol, Tetta, Black Pepper, May in Moral, Halilintar, Copergo, Cooper, BatuLase

In fact, the crime of gang motor was very violent, the perpetrator does not attention of killing his victims as happened in the Veteran street North on February 10, 2015, ruslis brother was killed and The same happened in 2014, Revelation first brother died as a result of being hit arc in Independence Pioneer Road km 11 Makassar on Saturday (06/09/2014). Followed by Riosbrother Rivaldo, stab wounds in his back on Tuesday (16/09/2014) (Tribunenews, 2015) the fact that the government and its apparatus still considers Motorcycle Gang Crime is still just a rumor despite casualties. Government indifference to evil motorcycle gang make commotion cyberspace, "Makassar is not safety" became Trending Topic on Twitter. In fact, the British media British Broadcasting Corporation (BBC) made the subject of preaching. Basically, Sarcasm is delivered to urge the government and security apparatus to take a progressive attitude to address the behavior of the robber gang Motor. Until the end of Ramadan Pamanto Makassar Mayor (Danny) conducted a joint press release Makassar police officer Commissioner Ferry Abraham wants to address this with preventive measures. Preventive action is from the government seeks to supervise the students in the school. Therefore, the perpetrator of Gang Motor majority from the student. While the police officer preventive action by capturing spreader issue "Makassar is not safety" in social media. Responses are disbursed by the government and security apparatus tends to marginalize other parties that sparked the rumors. However, rumors are not born from empty space but stands on the social processes going on in society. Human crimes against humans will come mold only and anywhere. Evil effects of man by man resulted in prolonged psychological effect and helped influence on social relations. As is, the birth of a meme photos mayor and sarcasm "Makassar is not safety" is the effect of fear of society (public space) against threats that are haunting him that is evil robber motorcycle gang in Makassar.

Crimes by motorcycle gang lately very disturbing society. Anyone who involved in it, whether apparatus or not, anarchy to take the life of a criminal action that has been intolerable. Indirectly, this issue has an adverse effect on the next generation of education base on above explanation, we can put forward that the motorcycle gang has existed and flourished in Makassar and has become part of Makassar and is a phenomenon that must be observed by the government for all element-element urban communities (including motorcycle gangs as the punk culture) can be embraced so that it can be active in the development activities.

3.2. Factors Cause the occurrence of Violent Crime gang member Motor in Makassar city.

Before talking about the causative factors of violent acts performed by members of a motorcycle gang in the city of Makassar, the author will expose the lands where the research profile of the author. Areas of research the author i.e. Makassar city is the fourth largest city in Indonesia and the largest in eastern Indonesia that has an area of 175.79 km² with a population of 1,112,688 inhabitants, so that the town was already a metropolitan city. In the administration of the city is made up of 14 districts and 143 villages. It is situated at an altitude of between 0-25 m from sea level. Residents of the city of Makassar in 2011 were recorded as many as 1,523,520 soul consisting of 811,449 men and 862,458 women with average growth 1.65 more each year. Makassar city community consists of several ethnic peaceful coexistence as ethnic Bugis, Makassar, ethnic Chinese, ethnic Toraja, Mandar and ethnicity.

Source: Data Polrestabes Makassar.

The Data from Polrestabes who has turned out to be from authors describe above 14 sub district, Sub district 4 of them with violence-prone members of a motorcycle gang in the city of Makassar which are potentially huge for the occurrence of crimes, especially violent crimes; Tamalanrea, Rappocini, Mamajang, and Makassar Sub-district. In this area, gang motor always times do violent acts, one of which on the territory of Saddang River Road, one of the students of State University of Makassar (UNM) on behalf of Ibrahim, Aged 22 years, majoring in sports, a six-Semester, had been molested by a group of members of the motorcycle gang so that he died. Then members of the motorcycle gang case involved a brawl with the citizens of Pareman River in Bali, Makassar, because members of the motorcycle gang took offense after a number of residents of rebuking one of the members of the motorcycle gang to stop the race. The majority of the members of the motorcycle gang crime consist of minors. Violent crime is social phenomena that interfere with human life and its existence cannot be avoided. Similarly violent crimes performed by members of the motorcycle gang which is a form of social phenomena that occur in the community. Research by the author aims to discover, describe and analyze data on the factors cause the occurrence of violent crimes committed by members of the motorcycle gang and the factors that inhibit the implementation of efforts to combat violent crime as well as the efforts to overcome the barrier factors.

Based on the results of research by the author about the behavior of violence carried out by members of a motorcycle gang in the city of Makassar, namely through the interview of one of the members of the motorcycle gang on behalf of Jars, age 15, Irfandi age 14 years, and the apparatus of the police name's Hasan Basri found important facts about the causes of the occurrence of violent gang members in the area above, namely:

1) Educational Factors. The educational factor in this case is indeed a very important role in the life of society, does not cover the possibility of various crimes with their low level of education of the culprit. This is also happening in the area of research the author in a conflict-prone region city of Makassar. From the data successfully retrieved turned out to be a percentage of the level of education on site research motorcycle gang members of violent crime is low.

From the results of the research the author of on the Road North of Makassar Veteran, one of the residents in the area on behalf of Bakri, suggested that the population in this region average no educated especially moral education and religion.

Low levels of education in the region is an indication of people's primary easily provoked to commit crimes, especially violent crimes in this case members of a motorcycle gang. According to one informant i.e. Saim Sham, reporter Sulawesi Post explained that the minimal educational background makes every individual (the majority) in a region prone to fights very difficult accepting the various suggestions are positive and more appropriate violated a variety of rules that apply. The absence of basic religious education and moral level of emotional control is to make each individual is very low so easily provoked or in provocation.

2) Environmental factors.

Environment also plays an active role in creating the perpetrator-perpetrators of violent motorcycle gang members. The environment of the slums and remote makes the region vulnerable to various forms of crime such as theft, tampering, and murder, as well as the unscrupulous actions.

According to this theory is commonly referred to as a French sect says that:

Someone committed a crime because it is affected by factors in sekitarnya lingkungan, good family environment, economic, social, cultural, defence security included with the defense with the outside world, as well as technology.

The influx of goods from abroad such as television, books, and movies with a variety of advertising as they join also determines the height of low levels of violent crime gang member motor in Makassar city.

3) Age factor.

From the author's research results in Makassar in Polrestabes Today (violent motorcycle gang member) obtained the fact that the age of the perpetrators belong to the young, i.e. 12-17 years of age are at a transitional period (teens) are still having trouble notabenehya the environmental adaptation of their personality so easily influenced by negative things. The nature of which is still classified as labile, emotional and easily provoked to violence gang members making motor difficult to anticipated, although it cannot be denied that many adults who are involved in it.

4) The role of the Media.

It cannot be denied that at the moment the kids and teens learn a lot watching the scenes of violence through media such as television or electronic readings and also games or games that are violent-themed. See the fights and the killing though a bit will cause stimulation and allow it to replicate the model of such violence. The author finds the facts in the life of the community that, children who have levels of aggression are likely to act violently towards other children after witnessing the violent scenes and increase aggression in everyday life and the possible effects of this nature resides.

5) Distribution and population density.

Data distribution and population density overall density of 6330 jiwa/km² Makassar city, but the concentration of the most densely populated areas are found in the four sub-district, sub-district of Tamalanrea, district Rappocini, Mamajang sub district, district of Makassar that the population density is above the 20000 jiwa/km². Distribution of the population and the uneven number of population density in the area is one of the trigger factors often occurrence of crimes in this case of violence committed by members of a motorcycle gang.

The data from the author's research results in home custody Clas I Makassar, displayed data:

The number of prisoners in 2012 is as much as 976 people, of whom 421 prisoners and more are just ordinary prisoners. Through direct interviews with one of the members of a motorcycle gang in the city of Makassar named Jars, age 15 years said that founding purpose motorcycle gang, namely:

a) Friends to multiply and expand the Association;

b) showed that gang members had many motors;

c) To show to the other motorcycle gang that motor that he has high speed so no other motor that can fight it in a wild race arena.

d) To find pleasure and satisfaction at the time of the anarchist action on the highway.

From the results of the interview also brings about the fact that the formation of the motorcycle gang in the city of Makassar was originally get-togethers of fellow lovers of the motor, so it turned into a motorcycle gang that

included dozens of people. Several members of the motorcycle gang is the son of junior high school (MIDDLE SCHOOL) and high school (HIGH SCHOOL) or equivalents, using various types of motors.

From some reason the creation of the motorcycle gang, very reflective of the actions that are against the law. In the presence of members of a motorcycle gang in the city of Makassar, road users often become victims with the actions being undertaken by the motorcycle gang.

IV. CONCLUSIONS

- 1) The basic fundamentally of gang motor in Makassar start from wild rice. For those who feel not accept with the result of rice then provoking the use of violent means. This is one of the trigger motorcycle gang in Makassar. Wild racing action has been around since the 90s but started to bloom again the case began in 2010.
- 2) Based on this information it can be concluded that there are at least 10 motorcycle gang sub community in Makassar is *Mappakoe, Lontara, Sekicol / Skejol, Tetta, Black Pepper, May in Moral, Halilintar, Copergo, Cooper, Batu Lase*
- 3) General focus for destroying. Both the young and old can become the object of radical movement actors of gang motor for anarchist action. . Several target, such as Alfa Mart, Indo Mart and the other and the accident was done at night.
- 4) There were some factors as background Gang Motor in Makassar like education, environment, age, role of media, and distribution and population density
