#### Abstract

: Media consists of various means of communication such as radio, newspaper, magazine, television, cinema, internet, social media, etc. It is intended to reach a large audience within fraction of seconds. Now a day's media turn out to be an essential part of our daily life. It helps to create and share information, knowledge and public opinion and also helps to strengthen the society in a positive way. As the fourth pillar of democracy media plays an important role in protecting people's interest and creating awareness about many societal issues among public. It has enormous effect on lives of men, women, children, youngsters, aged people and others. Media is a significant channel of disseminating useful information to the public and thereby it empowers people. The quick way of disseminating information helps to implement the developmental plans and programs potentially in both rural and urban areas. This will help people to think critically about any information they get. In this way, media also impacts on women's lives and their thoughts. It is necessary for women representatives to get knowledge about various developmental schemes and plans for rural development. Because women members are the representatives of local government and they are responsible for the overall development of rural areas. Therefore, this research study focuses on exploring media's role in disseminating information regarding various schemes among Women Gram Panchayat Members of Tumkuru District, Karnataka State which aims to explore how media influences on the lives of women panchayat members, how they access media content and how media serves as an important tool to disseminate information regarding various developmental schemes. The data was collected through surveys. The study examined the media habits, influence of media and usage of information in the media by women representatives.

Keywords: Media, Women Gram Panchayat members, Local governance, Developmental Schemes for Rural Development.

## I. Introduction:

Media consists of various means of communication such as radio, newspaper, magazine, television, cinema, internet, social media, etc. It is intended to reach a large audience within fraction of seconds. Now a day's media turn out to be an essential part of our daily life. It helps to create and share information, knowledge and public opinion and also helps to strengthen the society in a positive way. People depend on media fully, without media people would be isolated from society, from the government, from the representatives and from the neighbors, neighboring cities too. Media always played an important role in the development of society and nation.

As the fourth pillar of democracy media plays an important role in protecting people's interest and creating awareness about many societal issues among public. It has enormous effect on lives of men, women, children, youngsters, aged people and others. It has been one of the important tools to inform the mass audience, educate them with proper information and entertain the people.

Media is a significant channel of disseminating useful information to the public and thereby it empowers people. The quick way of disseminating information helps to implement the developmental plans and programs potentially in both rural and urban areas. This will help people to think critically about any information they get. In this way, media also impacts on women's lives and their thoughts. It is necessary for
women representatives to get knowledge about various developmental schemes and plans for rural development. Because women members are the representatives of local government and they are responsible for the overall development of rural areas.

Media should have the capability of disseminating information because it should have concern on individuals, genders, communities, areas and society. This will help to enhance the decision making process and help to solve societal problems. Every medium has different type of information disseminating process. For example, through printed form, through audio, visuals, etc. people will get information. Behind every disseminating process there is some procedures and plans. Because every media have the responsibility that it should not provide fake information or half information regarding any issues and the information which they provide should be fact based, real and cross checked.

Essential Information is much needed for the growth of any society. In this regard, media is the key to provide information regarding gender equality, eradication of discrimination, education, employment, providing platforms for women to showcase their thoughts and ideas and so on.

Therefore, this research study focuses on exploring media's role in disseminating information regarding various schemes among Women Gram Panchayat Members of Tumkuru District, Karnataka State which aims to explore how media influences on the lives of women panchayat members, how they access media content and how media serves as an important tool to disseminate information regarding various developmental schemes. The data was collected through surveys. The study examined the media habits, influence of media and usage of information in the media by women representatives.

## II. Review of Literature:

Review of literature is a summary of scholarly articles, books, thesis, journals and other sources related to a specific research topic. It collects relevant and timely information related to a particular topic. This part provides literature reviews of scholarly articles related to the research article 'Exploring Media's Role in Disseminating Information Regarding Various Schemes among Women Gram Panchayat Members' and impact of media on women representatives and how they access information.

Kumar Ashwani and Lahaik Parul (2022) in their research 'Impact of Mass Media on Rural Women: A Study of Shimla District' stated that the accessibility of mass media among rural women was very good and effective. Mass media played an important role in changing the behavior of rural women and there have been significant socio-cultural changes in their life through mass media. Despite the restricted reach and accessibility especially in rural and far flung areas, mass media affected the lives of rural women positively by informing them about the new developments, by entertaining them and influencing their attitude, opinions and actions on a variety of subjects.

Paul Surjit and as Saini (2022) in their research 'Investigating Information Dissemination and Citizen Engagement through Government Social Media during the COVID-19 Crisis' explored how effectively the Indian Government utilized social media to communicate emergency information and promote citizen engagement and awareness during the first wave of covid-19 crisis. They highlighted the clusters of words/terms present in the tweets related to COVID-19 combating strategies, guidelines and updates. They also suggested that government agencies should improve ways by enhancing media richness and dialogic loop elements such as surveys, polls and responses in the crisis communication.

Omotayo Monsuru Quadri, Oyetunji Oyesola Oluwasina and Adebanjo Adebiyi (2021) in their research 'The Role of Social Media in Information dissemination in the Pandemic Era' stated that the relevance of social media outlets cannot be overemphasized with recourse to information dissemination. The study recommended that social media users should stop spreading fake news and inflammatory messages that may result in violence, fear and confusion of individual health status. They also stressed that Government should collaborate with security agencies to monitor social media accounts so as to counter propaganda, hate speech and other hazardous contents.

Sulocahana G S and Prakash Jagadish (2019) in their research 'Gram Panchayat Daily Reading Habits of Elected Women Members: A Case Study of Tumkur' highlighted the fact that print media is still influential in India, highlights the growth of regional language newspapers like Kannada. They stated that governments should use mass media to implement any rural development projects quickly and transparently. Government officials and village panchayat officials should work hard to advance their villages in the development and implementation of all gram panchayats.

Chandrashekhar E (2015) in his research 'Dissemination of Health Related Issues through Mass Media: An Overview' shows that the message containing health related information should not be boring. It should be able to get attention of the people in the first place so that people for whom media is a source of entertainment may not feel put off. Media should give clear message which are in consonance with the prior general public knowledge so that it is acceptable to the people.

## III. Statement of the problem:

To explore the role of media in disseminating information among Women Gram Panchayat, the study entitled "Exploring Media's Role in Disseminating Information Regarding Various Schemes among Women Gram Panchayat Members: A Case Study of Tumkuru District" aims to study the following objectives:

## Objectives:

* To find out the media habits among women gram panchayat members.
* To know what type of news related to rural development women members consume through different media.
* To study the socio-political characteristic of women gram panchayat members.
* To explore how media disseminate information regarding various schemes of rural development.
* To find out how Women Gram Panchayat members utilize media platforms in local governance.

By observing the above objectives, the study aims to provide valuable resources into the exploring media's role in disseminating information regarding various schemes among Women Gram Panchayat Members and its impact on their social and political life.

## IV. Methodology / Research Design:

Research methodology means it is a specific way of conducting research which is helpful in identifying the sample, sampling method, sample size, tools of data collection, and statistical methods used to analyze the collected data.

## Research Design:

The present explores the role of media in disseminating information regarding various schemes among Women Gram Panchayat members. For the present research "Random Sampling Technique" is used to choose the samples. This study was conducted in Tumkuru city of Karnataka State with 160 respondents. The primary data was collected through a structured questionnaire. Its main purpose is to explore how media has impacted on the ideas and thoughts of women representatives and how it is helpful in disseminating information regarding various schemes.

## V. Data Analysis / Findings:

This part analyses the findings or data collected through a structured questionnaire. The results of the study are shown under the following subheadings with a table.

Table 6.1 Distribution of Respondents by Age

| Age Group | Frequency | Percentage |
| :---: | :---: | :---: |
| Below 30 | 36 | 22.5 |
| 31 to 45 years | 93 | 58.12 |
| 46 to 60 years | 28 | 17.5 |
| Above 60 | 3 | 1.88 |
| Total | $\mathbf{1 6 0}$ | $\mathbf{1 0 0}$ |

Table 6.1 reveals the age wise distribution of selected respondents. It shows that more than half $58.12 \%(\mathrm{~N}=93)$ of the respondents belongs to the age group between 31 to 45 years, followed by $22.5 \%(\mathrm{~N}=36)$ were below 30 years, $17.5 \%(\mathrm{~N}=28)$ of the respondents belongs to the age group between 46 to 60 years and only $1.88 \%(\mathrm{~N}=3)$ of them were above 60 years.

Table 6.2 Distribution of Respondents by Educational Qualification

| Educational Qualification | Frequency | Percentage |
| :---: | :---: | :---: |
| Illiterate | 26 | 16.25 |
| Primary/ High school | 113 | 70.62 |
| College/ Degree | 20 | 12.5 |
| PG | 1 | 0.63 |
| Total | $\mathbf{1 6 0}$ | $\mathbf{1 0 0}$ |

Table 6.2 indicates the educational qualification of the respondents selected for the study. It shows that significant number $70.62 \%(\mathrm{~N}=113)$ of the respondents completed Primary and High school education,
followed by $16.25 \%(\mathrm{~N}=26)$ of the respondents were illiterates, $12.5 \%(\mathrm{~N}=20)$ of the respondents completed Degree and very least $0.63 \%(\mathrm{~N}=1)$ only one respondent completed post-graduation.

Table 6.3 Distribution of Respondents by Category

| Category | Frequency | Percentage |
| :---: | :---: | :---: |
| SC/ST | 88 | 55 |
| OBC | 17 | 10.62 |
| General Category | 53 | 33.12 |
| Minority | 2 | 1.26 |
| Total | $\mathbf{1 6 0}$ | $\mathbf{1 0 0}$ |

The data presented in the table 6.3 reveals the category wise distribution of selected respondents. It shows that more than half $55 \%(\mathrm{~N}=88)$ of the respondents belonged to the SC/ST category, followed by $33.12 \%$ ( $\mathrm{N}=53$ ) of the respondents belonged to the General category, $10.62 \% ~(\mathrm{~N}=17$ ) belonged to Other Backward Classes and the only $1.26 \%(\mathrm{~N}=2)$ of them belonged to Minority group.

Table 6.4 Distribution of Respondents by Annual Income

| Annual Income | Frequency | Percentage |
| :---: | :---: | :---: |
| Up to one lakh | 30 | 18.76 |
| 1-3 lakhs | 129 | 80.62 |
| 3-5 lakhs | 1 | 0.62 |
| Above 5 lakhs | 0 | 0 |
| Total | $\mathbf{1 6 0}$ | $\mathbf{1 0 0}$ |

Table 6.4 reveals the distribution of respondents based on their annual income. According to this table, more than half $80.62 \%(\mathrm{~N}=129)$ of the respondents have an annual income of 1 to 3 lakhs, followed by $18.76 \%$ $(\mathrm{N}=30)$ have up to one lakh annual income, only $0.62 \%(\mathrm{~N}=1)$ one respondent has an annual income of 3 to 5 lakhs and none of the respondents doesn't have above 5 lakhs annual income.

Table 6.5 Distribution of Respondents based on Employment

| Employment | Frequency | Percentage |
| :---: | :---: | :---: |
| Agriculture | 83 | 51.87 |
| Daily wages | 2 | 1.26 |
| Business | 33 | 20.62 |
| Housewife | 42 | 26.25 |
| Total | $\mathbf{1 6 0}$ | $\mathbf{1 0 0}$ |

Table 6.4 indicates the distribution of respondents based in their employment. It shows that more than half $51.87 \%(\mathrm{~N}=83)$ of the respondents were working in the agriculture sector, followed by $26.25 \%(\mathrm{~N}=42)$ of them were housewives, $20.62 \%(\mathrm{~N}=33)$ of the respondents run their own businesses and the only $1.26 \%(\mathrm{~N}=2)$ two respondents were working for daily wages.

Table 6.6 Distribution of respondents based on the Family structure

| Family structure | Frequency | Percentage |
| :---: | :---: | :---: |
| Nuclear family | 139 | 86.88 |
| Joint family | 21 | 13.12 |
| Total | $\mathbf{1 6 0}$ | $\mathbf{1 0 0}$ |

Table 6.6 indicates the family structure of the selected respondents. It shows that a greater majority $86.88 \%(\mathrm{~N}=139)$ of the respondents belong to the nuclear family, while only $13.12 \%(\mathrm{~N}=21)$ of the respondents belong to the joint family.

Table 6.7 Distribution of Women representatives according to their Social participation:

| Social participation | Frequency | Percentage |
| :---: | :---: | :---: |
| Self-Help Groups (SHGs) | 89 | 55.62 |

| Non-Government Organizations | 44 | 27.5 |
| :---: | :---: | :---: |
| Women's Club | 67 | 41.87 |

The information in the table 6.7 reveals the social participation of the selected respondents. It was found that more than half $55.62 \% ~(~ N=89) ~ o f ~ t h e ~ r e s p o n d e n t s ~ w e r e ~ m e m b e r s ~ o f ~ t h e ~ S e l f-H e l p ~ G r o u p s ~(S H G s), ~$ followed by $41.87 \%(\mathrm{~N}=67)$ of them were members of the Women's Club and $27.5 \%(\mathrm{~N}=44)$ of the respondents were part of Non-Government Organizations/NGOs.

Table 6.8 Media availability at respondents home

| Media | Frequency | Percentage |
| :---: | :---: | :---: |
| Newspaper | 70 | 43.75 |
| Radio | 19 | 11.87 |
| Television | 118 | 73.75 |
| Internet | 112 | 70 |

The data presented in the table 6.8 indicates the availability of different media in respondents' homes. It shows that majority $73.75 \%(\mathrm{~N}=118)$ of the respondents have a television in their home, while $70 \%(\mathrm{~N}=112)$ of the respondents have access to the internet, followed by $43.75 \%(\mathrm{~N}=70)$ of them have access to newspapers, and very less $11.87 \%(\mathrm{~N}=19)$ of them have the radio in their home. It was found from the study that majority of the respondents have television and internet facility in their homes and radio is the media preferred by very less respondents.

Table 6.9 Distribution of respondents based on radio listening

| Radio listening | Frequency | Percentage |
| :---: | :---: | :---: |
| Everyday | 15 | 9.38 |
| Occasionally | 83 | 51.87 |
| Never | 62 | 38.75 |
| Total | $\mathbf{1 6 0}$ | $\mathbf{1 0 0}$ |

Table 6.9 reveals the frequency of radio listening by the selected respondents. It indicates that more than half $51.87 \%(\mathrm{~N}=83)$ of the respondents who listen to the radio news and programs occasionally, followed by $38.75 \% ~(\mathrm{~N}=62)$ of them never listen to the radio and very less $9.38 \%(\mathrm{~N}=15)$ of the respondents who listen to the radio every day.

Table 6.10 Types of radio programs listened by the Respondents:

| Types of radio programmes | Frequency | Percentage |
| :---: | :---: | :---: |
| News | 69 | 43.12 |
| Discussion | 28 | 17.5 |
| Agriculture related programs | 39 | 24.37 |
| Health related programs | 51 | 31.87 |
| Janapada programs | 44 | 27.5 |

Table 6.10 indicates the types of radio programs listened by the selected respondents. It was found that $43.12 \% ~(\mathrm{~N}=69)$ of the respondents listen to radio news, followed by $31.87 \%(\mathrm{~N}=51)$ of them listen to health related programs, $27.5 \%(\mathrm{~N}=44)$ of the respondents listen to janapada programs, $24.37 \%(\mathrm{~N}=39)$ of them listen to agriculture related programs and $17.5 \%(\mathrm{~N}=28)$ of the respondents listen to discussions.

Table 6.11 Distribution of respondents based on reading newspaper

| Reading newspaper | Frequency | Percentage |
| :---: | :---: | :---: |
| Everyday | 67 | 41.88 |
| Occasionally | 65 | 40.62 |
| Never | 28 | 17.5 |
| Total | $\mathbf{1 6 0}$ | $\mathbf{1 0 0}$ |

Table 6.11 reveals the frequency of reading newspaper by the selected respondents. It indicates that $41.88 \%(\mathrm{~N}=67)$ of the respondents read newspapers every day, followed by $40.62 \%(\mathrm{~N}=65)$ of them who read newspapers occasionally and the remaining $17.5 \%(\mathrm{~N}=28)$ of them never read newspapers.

Table 6.12 Kinds of news reading by the Respondents:

| Kind of news | Frequency | Percentage |
| :---: | :---: | :---: |
| Political news | 72 | 45 |
| Crime news | 38 | 23.75 |
| Commerce news | 49 | 30.62 |
| Cinema | 79 | 49.37 |
| Human Interest news | 112 | 70 |
| Local news | 116 | 72.5 |

Table 6.12 indicates the kinds of news read by the selected respondents. It was found that more than half $72.5 \%(\mathrm{~N}=116)$ of the respondents read local news, followed by $70 \%(\mathrm{~N}=112)$ of them read human interest news, $49.37 \% ~(\mathrm{~N}=79)$ of the respondents read cinema news, $45 \% ~(\mathrm{~N}=72)$ of them read political news, $30.62 \%$ $(\mathrm{N}=49)$ of them read commerce news and $23.75 \%(\mathrm{~N}=38)$ of the respondents read crime news.

Table 6.13 Distribution of respondents based on watching television

| Watching TV | Frequency | Percentage |
| :---: | :---: | :---: |
| Everyday | 132 | 82.5 |
| Occasionally | 28 | 17.5 |
| Never | 0 | 0 |
| Total | $\mathbf{1 6 0}$ | $\mathbf{1 0 0}$ |

Table 6.13 reveals the frequency of watching television by the selected respondents. It was found that a greater majority $82.5 \%(\mathrm{~N}=132)$ of the respondents watch television every day, followed by $17.5 \%(\mathrm{~N}=28)$ of the respondents who watch television occasionally and none of them said they never watch television.

Table 6.14 Type of programs watched by the Respondents:

| Types of programs | Frequency | Percentage |
| :---: | :---: | :---: |
| News | 120 | 75 |
| Health | 62 | 38.75 |
| Serials | 133 | 83.12 |
| Cinema | 91 | 56.87 |
| Education | 65 | 40.62 |
| Agriculture | 54 | 3.75 |

Table 6.14 indicates the types of programs watched by the selected respondents. It was found that a great majority $83.12 \%(\mathrm{~N}=133)$ of the respondents watch serials, followed by $75 \%(\mathrm{~N}=120)$ of the respondents watch news, $56.87 \%(\mathrm{~N}=91)$ of them watch cinemas, $40.62 \%(\mathrm{~N}=65)$ of them watch education programs, $38.75 \%$ ( $\mathrm{N}=62$ ) of them watch health related programs and only $3.75 \%(\mathrm{~N}=54)$ of the respondents watch agriculture programs.

Table 6.15 Distribution of respondents regarding usage of Internet

| Usage of Internet | Frequency | Percentage |
| :---: | :---: | :---: |
| Everyday | 78 | 48.75 |
| Occasionally | 56 | 35 |
| Never | 26 | 16.25 |
| Total | $\mathbf{1 6 0}$ | $\mathbf{1 0 0}$ |

Table 6.15 reveals the frequency of using internet by the total respondents selected for the study. It shows that nearly half $48.75 \%(\mathrm{~N}=78)$ of the respondents access internet every day, whereas $35 \%(\mathrm{~N}=56)$ of them who access internet occasionally and the remaining $16.25 \%(\mathrm{~N}=26)$ of respondents never use the internet.

Table 6.16 Purpose of using media

| Purpose of using media | Frequency | Percentage |
| :---: | :---: | :---: |
| News/ Information | 115 | 71.87 |
| Entertainment | 125 | 78.12 |

| Commercial | 34 | 21.25 |
| :---: | :---: | :---: |
| Education | 57 | 35.62 |
| To know about Govt schemes | 74 | 46.25 |
| Communication | 117 | 73.12 |

The information in the table 6.16 reveals the purpose of using media by the respondents selected for the study. It shows that the majority $78.12 \%(\mathrm{~N}=125)$ of the respondents access media for entertainment purposes, followed by $73.12 \%(\mathrm{~N}=117)$ of them access media for communication, $71.87 \%(\mathrm{~N}=115)$ of them access media for news and information purpose, $46.25 \%(\mathrm{~N}=74)$ of the respondents access media to know about Government schemes, $35.62 \%(\mathrm{~N}=57)$ of them access media for education purpose and $21.25 \%(\mathrm{~N}=34)$ of them access media for commercial purpose. It was found that majority of the respondent's access media for entertainment and communication purpose and the very least number of respondents use media for commercial purpose.

Table 6.17 Usage of different social media sites

| Social media sites | Facebook |  | WhatsApp |  | Instagram |  | YouTube |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Regularly | 30 | 18.75 | 81 | 50.62 | 24 | 15 | 92 | 57.5 |
| Occasionally | 103 | 64.37 | 69 | 43.12 | 52 | 32.5 | 54 | 33.75 |
| Never | 27 | 16.88 | 10 | 6.26 | 84 | 52.5 | 14 | 8.75 |
| Total | $\mathbf{1 6 0}$ | $\mathbf{1 0 0}$ | $\mathbf{1 6 0}$ | $\mathbf{1 0 0}$ | $\mathbf{1 6 0}$ | $\mathbf{1 0 0}$ | $\mathbf{1 6 0}$ | $\mathbf{1 0 0}$ |

The data presented in the table 6.17 indicates the usage of different social media sites among the selected respondents. It reveals that a significant number that is more than half $64.37 \%(\mathrm{~N}=103)$ of the respondents use Facebook occasionally, followed by $18.75 \%(\mathrm{~N}=30)$ of them use Facebook regularly and the remaining $16.88 \%(\mathrm{~N}=27)$ of the respondents do not use Facebook. While, more than half $50.62 \%(\mathrm{~N}=81)$ of the respondents use WhatsApp regularly, followed by $43.12 \% ~(\mathrm{~N}=69)$ of them use WhatsApp occasionally and the remaining $6.26 \%(\mathrm{~N}=10)$ of the respondents do not use WhatsApp.

It was also found that more than half $52.5 \%(\mathrm{~N}=84)$ of the respondents do not use Instagram in their daily life, followed by $32.5 \%(\mathrm{~N}=52)$ of them use Instagram occasionally and the remaining $15 \%(\mathrm{~N}=24)$ of the respondents use Instagram regularly. Whereas, more than half $57.5 \%(\mathrm{~N}=92)$ of the respondents use YouTube regularly, followed by $33.75 \%(\mathrm{~N}=54)$ of them use YouTube occasionally and the only $8.75 \%(\mathrm{~N}=14)$ respondents do not use YouTube.

Table 6.18 Frequency of knowing Government Schemes by Respondents:

| Schemes | Frequency | Percentage |
| :---: | :---: | :---: |
| MGNREGS | 127 | 79.37 |
| Drinking Water | 142 | 88.75 |
| Swacch Bharat Mission | 145 | 90.62 |
| Rural Development | 148 | 92.5 |
| PMGSY | 134 | 83.75 |

Table 6.18 reveals the frequency of knowledge about Government schemes by the selected respondents. It was found that a greater majority $92.5 \% ~(~ N=148) ~ o f ~ t h e ~ r e s p o n d e n t s ~ h a v e ~ k n o w l e d g e ~ a b o u t ~$ Rural development scheme, followed by $90.62 \%(\mathrm{~N}=145)$ of the respondents know about Swacch Bharat Mission scheme, $88.75 \%(\mathrm{~N}=142)$ of them know about Drinking Water, $83.75 \%(\mathrm{~N}=134)$ of them know about Prime Minister Gram Sadak Yojana (PMGSY) and $79.37 \%$ ( $\mathrm{N}=127$ ) of them know about Mahatma Gandhi National Rural Employment Guarantee Scheme (MGNREGS).

Table 6.19 Media provides information regarding local governance

| Information regarding <br> local governance | About GP meeting <br> news | About lack of <br> cooperation | About administrative <br> problem |
| :---: | :---: | :---: | :---: |
| Always | $87(54.37)$ | $90(56.25)$ | $75(46.87)$ |
| Sometimes | $58(36.25)$ | $42(26.25)$ | $50(31.25)$ |
| Never | $15(9.38)$ | $28(17.5)$ | $35(21.88)$ |
| Total | $\mathbf{1 6 0}(\mathbf{1 0 0})$ | $\mathbf{1 6 0}(\mathbf{1 0 0})$ | $\mathbf{1 6 0}(\mathbf{1 0 0})$ |

The information in the table 6.19 indicates how media provides information regarding local governance. It was found that more than half $54.37 \%(\mathrm{~N}=87)$ of the respondents expressed that media always provides information regarding Gram Panchayat meeting news, followed by $36.25 \%(\mathrm{~N}=58)$ of them opined
that media sometimes provides information and the only $9.38 \%(\mathrm{~N}=15)$ of the respondents opined that media never provides information regarding Gram Panchayat meeting news. Whereas, more than half $56.25 \%$ ( $\mathrm{N}=90$ ) of the respondents expressed that media always provides information regarding lack of cooperation in local governance, followed by $26.25 \%(\mathrm{~N}=42)$ of them opined that media sometimes provides information and the remaining $17.5 \%(\mathrm{~N}=28)$ of the respondents opined that media never provides information regarding lack of cooperation in local governance.

It is noted that, nearly half $46.87 \%(\mathrm{~N}=75)$ of the respondents expressed that media always provides information regarding administrative problem in local governance, followed by $31.25 \%(\mathrm{~N}=50)$ of them opined that media sometimes provides information and the remaining $21.88 \%(\mathrm{~N}=35)$ of the respondents opined that media never provides information regarding administrative problem in local governance.

Table 6.20 Media provides information regarding women empowerment

| Info about women <br> empowerment | Individual <br> empowerment | Social <br> empowerment | Political <br> empowerment | Cultural <br> empowerment |
| :---: | :---: | :---: | :---: | :---: |
| Always | $78(48.75)$ | $84(52.5)$ | $82(51.25)$ | $86(55)$ |
| Sometimes | $52(32.5)$ | $52(32.5)$ | $46(28.75)$ | $49(26.25)$ |
| Never | $30(18.75)$ | $24(15)$ | $32(20)$ | $25(18.75)$ |
| Total | $\mathbf{1 6 0}(\mathbf{1 0 0})$ | $\mathbf{1 6 0}(\mathbf{1 0 0})$ | $\mathbf{1 6 0}(\mathbf{1 0 0})$ | $\mathbf{1 6 0}(\mathbf{1 0 0})$ |

The data presented in the table 6.20 indicates to what extent media provides information regarding women empowerment factors. It was found that nearly half $48.75 \%(N=78)$ of the respondents expressed that media always provides information regarding individual empowerment of women, followed by $32.5 \%$ ( $\mathrm{N}=52$ ) of them opined that media sometimes provides information and the remaining $18.75 \%(\mathrm{~N}=30)$ of the respondents opined that media never provides information regarding individual empowerment of women. While more than half $52.5 \%(\mathrm{~N}=84)$ of the respondents expressed that media always provides information regarding social empowerment of women, followed by $32.5 \%(\mathrm{~N}=52)$ of them opined that media sometimes provides information and very less number $15 \%(\mathrm{~N}=24)$ of the respondents opined that media never provides information regarding social empowerment of women.

Over half, precisely $51.25 \%(\mathrm{~N}=82)$ of the respondents consider that media always provides information regarding political empowerment of women, followed by $28.75 \%(\mathrm{~N}=46)$ of them opined that media sometimes provides information and the $20 \%(\mathrm{~N}=32)$ of the respondents considers media never provides information regarding political empowerment of women. Meanwhile, a significant number $55 \%(\mathrm{~N}=86)$ of the respondents opined that media always provides information regarding cultural empowerment of women, followed by $26.25 \% ~(\mathrm{~N}=49)$ of them said media sometimes provides information and the remaining $18.75 \%$ $(\mathrm{N}=25)$ of the respondents opined media never provides information regarding cultural empowerment of women.

In conclusion, the data emphasizes the role of media in providing information about various dimensions of women empowerment. Respondents generally perceive media always provides information about individual, social, political, and cultural empowerment factors.

Table 6.21 Media provides more information regarding capacity building of women

| Info regarding capacity building | Newspaper | Radio | Television | Social Media |
| :---: | :---: | :---: | :---: | :---: |
| Gender Equality | $84(52.5)$ | $42(26.25)$ | $104(65)$ | $87(54.37)$ |
| Ignorance and Social evils | $86(53.75)$ | $30(18.75)$ | $92(57.5)$ | $85(53.12)$ |
| Health and Cleanliness | $92(57.5)$ | $37(23.12)$ | $105(65.62)$ | $89(55.62)$ |
| Education and Training | $98(61.25)$ | $35(21.87)$ | $97(60.62)$ | $82(51.25)$ |
| Reservation in politics | $102(63.75)$ | $29(18.12)$ | $104(65)$ | $93(58.12)$ |

The information in the table 6.21 reveals how media provides information regarding capacity building of women panchayat members. It was found that a significant number $65 \%(\mathrm{~N}=104)$ of the respondents expressed that television provides more information regarding gender equality, followed by social media $54.37 \%(\mathrm{~N}=87)$, newspaper $52.5 \%(\mathrm{~N}=84)$ and the radio $26.25 \%(\mathrm{~N}=42)$.

The data indicates that more than half $57.5 \%(\mathrm{~N}=92)$ of the respondents opined that television provides more information regarding ignorance and social evils, followed by newspaper $53.75 \%$ ( $\mathrm{N}=86$ ), social media $53.12 \%(\mathrm{~N}=85)$ and the radio $18.75 \%(\mathrm{~N}=30)$.

A significant portion $65.62 \%(\mathrm{~N}=105)$ of the respondents expressed that television provides more information regarding health and cleanliness, followed by newspaper $57.5 \% ~(~ N=92)$, social media $55.62 \%$ $(\mathrm{N}=82)$ and the radio $23.12 \%(\mathrm{~N}=37)$.

It is noted that more than half $61.25 \%(\mathrm{~N}=98)$ of the respondents opined that newspaper provides more information regarding education and training for capacity building of women, followed by television $60.62 \%$ ( $\mathrm{N}=97$ ), social media $51.25 \%(\mathrm{~N}=82)$ and the radio $21.87 \%(\mathrm{~N}=35)$.

It was also found that more than half $65 \%(\mathrm{~N}=104)$ of the respondents expressed that television provides more information regarding reservation for women in politics, followed by newspaper 63.75\% $(\mathrm{N}=102)$, social media $58.12 \%(\mathrm{~N}=93)$ and the radio $18.12 \%(\mathrm{~N}=29)$.

Table 6.22 Media provides information regarding development schemes

| Info about development schemes | Newspaper | Radio | Television | Social Media |
| :---: | :---: | :---: | :---: | :---: |
| Women's Helpline scheme | $92(57.5)$ | $38(23.75)$ | $110(68.75)$ | $94(58.75)$ |
| UjjwalaYojana | $102(63.75)$ | $36(22.5)$ | $107(66.87)$ | $89(55.62)$ |
| Rashtriya Mahila Kosh | $105(65.62)$ | $35(21.87)$ | $112(70)$ | $92(57.5)$ |
| STEP | $106(66.25)$ | $31(19.37)$ | $98(61.25)$ | $85(53.12)$ |
| NAREGA | $113(70.62)$ | $46(28.75)$ | $119(74.37)$ | $95(59.37)$ |
| Skill Development | $115(71.87)$ | $48(30)$ | $104(65)$ | $92(57.5)$ |

Table 6.22 reveals how media provides information regarding various development schemes which are helpful for rural development and women empowerment. It was found that a significant portion $68.75 \%$ $(\mathrm{N}=110)$ of the respondents expressed that television provides information regarding Women's Helpline Scheme, followed by social media $58.75 \%(\mathrm{~N}=94)$, newspaper $57.5 \%(\mathrm{~N}=92)$ and the radio $23.75 \%(\mathrm{~N}=38)$.

Whereas, more than half $66.87 \%(\mathrm{~N}=107)$ of the respondents opined that television provides information regarding Ujjwala Yojana, followed by newspaper 63.75\% ( $\mathrm{N}=102$ ), social media $55.62 \%(\mathrm{~N}=89)$ and the radio $22.5 \%(\mathrm{~N}=36)$.

Meanwhile, over $70 \%(\mathrm{~N}=112)$ of the respondents consider that television provides information regarding Rashtriya Mahila Kosh, followed by newspaper $65.62 \%$ ( $\mathrm{N}=105$ ), social media $57.5 \%$ ( $\mathrm{N}=92$ ) and the radio $21.87 \%(\mathrm{~N}=35)$.

It was noticed that more than half $66.25 \%(\mathrm{~N}=106)$ of the respondents expressed that newspaper provides information regarding STEP (Support to Training and employment Programme for Women) scheme, followed by television $61.25 \%(\mathrm{~N}=98)$, social media $53.12 \%(\mathrm{~N}=85)$ and the radio $19.37 \%(\mathrm{~N}=31)$.

Whereas, majority $74.37 \%(\mathrm{~N}=119)$ of the respondents opined that television provides information regarding NAREGA (National Rural Employment Guarantee Act) scheme, followed by newspaper $70.62 \%$ ( $\mathrm{N}=113$ ), social media $59.37 \% ~(\mathrm{~N}=95)$ and the radio $28.75 \% ~(\mathrm{~N}=46)$.

It was noted that more than half $71.87 \%(\mathrm{~N}=115)$ of the respondents consider that newspaper provides information regarding Skill Development scheme, followed by television $65 \%$ ( $\mathrm{N}=104$ ), social media $57.5 \%$ $(\mathrm{N}=92)$ and the radio $30 \%(\mathrm{~N}=48)$.

Table 6.23 Information regarding schemes in media useful for functioning as a GP member

| Schemes useful for functioning | Frequency | Percentage |
| :---: | :---: | :---: |
| Very useful | 82 | 51.25 |
| Useful | 50 | 31.25 |
| Not useful | 28 | 17.5 |
| Total | $\mathbf{1 6 0}$ | $\mathbf{1 0 0}$ |

Table 6.23 indicates that more than half $51.25 \%(\mathrm{~N}=82)$ of the respondents opined that information regarding schemes in media is very useful for functioning as a Gram Panchayat member, followed by $31.25 \%$ $(\mathrm{N}=50)$ of the respondents opined that information regarding schemes in media is useful for functioning and the remaining $17.5 \%(\mathrm{~N}=28)$ of the respondents opined that information regarding schemes in media is not useful for functioning as a Gram Panchayat member.

Table 6.24 More information about various schemes

| More info about schemes | Frequency | Percentage |
| :---: | :---: | :---: |
| Radio | 47 | 29.37 |
| Newspaper | 94 | 58.75 |
| Television | 105 | 65.62 |
| Social Media | 87 | 54.37 |
| Officials | 131 | 81.87 |

Table 6.24 reveals that majority $81.87 \%(\mathrm{~N}=131)$ of the respondents opined that expressed that concerned officials provides more information about various developmental schemes, whereas a significant number $65.62 \%(\mathrm{~N}=105)$ of the respondents opined that television provides more information about various schemes, followed by newspaper $58.75 \%$ ( $\mathrm{N}=94$ ), social media $54.37 \% ~(\mathrm{~N}=87$ ) and very less number $29.37 \%$ $(\mathrm{N}=47)$ of the respondents expressed that radio provides more information about various developmental
schemes. It was found from the above table that a greater majority of the respondents expressed that officials and television provides more information about various developmental schemes and radio is the media preferred by very less respondents.

Table 6.25 Problems will be solved through media

| Problems solved through media | Frequency | Percentage |
| :---: | :---: | :---: |
| Yes | 106 | 66.25 |
| No | 33 | 20.63 |
| To some extent | 21 | 13.12 |
| Total | $\mathbf{1 6 0}$ | $\mathbf{1 0 0}$ |

Table 6.25 shows that more than half $66.25 \%(\mathrm{~N}=106)$ of the respondents opined that problems will be solved through media, followed by $20.63 \%(\mathrm{~N}=33)$ of the respondents said that village problems will not be solved through media and the remaining $13.12 \%(\mathrm{~N}=21)$ of the respondents opined that to some extent media will be helpful in solving village problems.

Table 6.26 Utilization of news and stories related to various schemes

| Utilization of news | Frequency | Percentage |
| :---: | :---: | :---: |
| Completely | 120 | 75 |
| To some extent | 34 | 21.25 |
| Not at all | 6 | 3.75 |
| Total | $\mathbf{1 6 0}$ | $\mathbf{1 0 0}$ |

Table 6.26 indicates the utilization of news and stories related to various schemes by women members. It was found that a significant number $75 \%(\mathrm{~N}=120)$ of the respondents expressed that they completely utilize the news and stories related to various schemes published in media, followed by $21.25 \%(\mathrm{~N}=34)$ of the respondents opined that to some extent they utilize and very least number $3.75 \%(\mathrm{~N}=6)$ of the respondents opined that they not at all utilize the news and stories related to various schemes published in media.

Table 6.27 Trustworthy of information about various schemes in media

| Trustworthy of information | Frequency | Percentage |
| :---: | :---: | :---: |
| Completely | 104 | 65 |
| To some extent | 44 | 27.5 |
| Not at all | 12 | 7.5 |
| Total | $\mathbf{1 6 0}$ | $\mathbf{1 0 0}$ |

Table 6.27 reveals about the trustworthy of information about various schemes in media. It shows that more than half $65 \%(\mathrm{~N}=104)$ of the respondents expressed that they completely trust the information about various schemes published in media, followed by $27.5 \%(\mathrm{~N}=44)$ of the respondents opined that to some extent they trust the information and very less number $7.5 \%(\mathrm{~N}=12)$ of the respondents opined that they not at all trust the information about various schemes published in media.

Table 6.28 Quality of news about schemes

| Quality of news | Frequency | Percentage |
| :---: | :---: | :---: |
| Excellent | 15 | 9.38 |
| Good | 121 | 75.62 |
| Not good | 16 | 10 |
| Very poor | 8 | 5 |
| Total | $\mathbf{1 6 0}$ | $\mathbf{1 0 0}$ |

The information in the table 6.28 reveals the quality of news about various schemes in media. It shows that majority $75.62 \%(\mathrm{~N}=121)$ of the respondents opined that quality of the news about various schemes published on media is good, followed by $10 \%(\mathrm{~N}=16)$ respondents who opined that quality of the news is not good, $9.38 \%(\mathrm{~N}=15)$ of them opined that quality of the news is excellent and only $5 \%(\mathrm{~N}=8)$ respondents opined that quality of the news about various schemes published on media is very poor.

Table 6.29 Understanding of news about schemes

| Understanding of news |  |  |
| :---: | :---: | :---: |
| Very easy | Frequency | Percentage |

| Easy | 110 | 68.75 |
| :---: | :---: | :---: |
| Difficult | 16 | 10 |
| Very difficult | 10 | 6.25 |
| Total | $\mathbf{1 6 0}$ | $\mathbf{1 0 0}$ |

Table 6.29 reports that more than half $68.75 \%(\mathrm{~N}=110)$ of the respondents opined that language used in the news related to schemes in media is easy to understand, followed by $15 \%(\mathrm{~N}=24)$ of the respondents opined that it is very easy to understand, $10 \%(\mathrm{~N}=16)$ of them opined that language used in the news related to schemes in media is difficult and very few $6.25 \%(\mathrm{~N}=10)$ of the respondents opined that language used in media is very difficult to understand.

Table 6.30 News about various schemes provides complete information

| Complete info | Frequency | Percentage |
| :---: | :---: | :---: |
| Yes | 126 | 78.75 |
| No | 34 | 21.25 |
| Total | $\mathbf{1 6 0}$ | $\mathbf{1 0 0}$ |

Table 6.30 shows that majority $78.75 \%(\mathrm{~N}=126)$ of the respondents expressed that news published in the media provides complete information about various schemes whereas $21.25 \%(\mathrm{~N}=34)$ of the respondents expressed that news published in the media doesn't provide complete information.

Table 6.31 Need to increase the number of news related to various schemes

| Increase news | Frequency | Percentage |
| :---: | :---: | :---: |
| Yes | 138 | 86.25 |
| No | 22 | 13.75 |
| Total | $\mathbf{1 6 0}$ | $\mathbf{1 0 0}$ |

Table 6.31 reveals that majority $86.25 \%(\mathrm{~N}=138)$ of the respondents opined that there is a need to increase the number of news related to various schemes in media and the remaining $13.75 \%(\mathrm{~N}=22)$ of the respondents opined that there is no need to increase the number of news in media.

Table 6.32 Factors helpful to know about various schemes

| Factors helpful | Frequency | Percentage |
| :---: | :---: | :---: |
| Training | 106 | 66.25 |
| Information by officials | 130 | 81.25 |
| Information by media | 122 | 76.25 |

Table 6.32 indicates opinion of the respondents regarding the factors helpful to know about various schemes. It shows that a greater majority $81.25 \%(\mathrm{~N}=130)$ of the respondents opined that information given by the officials concerned is helpful to know about various schemes, whereas $76.25 \%(\mathrm{~N}=122)$ of them opined that information given by the media is helpful and a significant number $66.25 \%(\mathrm{~N}=540)$ of the respondents opined that training is helpful to know about various schemes.

Table 6.33 Questioning the credibility of the news about schemes

| Credibility of news | Frequency | Percentage |
| :---: | :---: | :---: |
| Always | 82 | 51.25 |
| Sometimes | 42 | 26.25 |
| Never | 36 | 22.5 |
| Total | $\mathbf{1 6 0}$ | $\mathbf{1 0 0}$ |

The data presented in table 6.33 reveals that more than half $51.25 \%(\mathrm{~N}=82)$ of the respondents said that they always questions the credibility of the news they consume, followed by $26.25 \%$ ( $\mathrm{N}=42$ ) of them sometimes questions the credibility of the news and $22.5 \%(\mathrm{~N}=36)$ of the respondents said that they never questions the credibility of the news about schemes which they consume through media.

## VI. Conclusion/ Summing up:

This research focused on exploring media's role in disseminating information regarding various schemes among women gram panchayat members of Tumkuru district. The study has also revealed the media habits of women members and its role in disseminating useful information which are helpful for their social and political life.

Within the selected number of respondents, it was reported that a substantial portion of women representatives were engaged in the agriculture sector. The study further unveiled that a majority of the respondents incorporate daily television viewing into their routines, with a comparatively lower number tuning into the radio. Whereas, more than half of the respondents access social media every day. The study underscores that majority of the respondent's access media for entertainment, communication and news and information purpose and the very least number of respondents use media for commercial purpose.

The study highlighted the fact that media plays a pivotal role in disseminating information regarding various schemes among women representatives. The study participants expressed how diverse media platforms contribute to circulating information regarding local governance such as gram panchayat meetings, about lack of cooperation and administrative problems.

Furthermore, the findings have illuminated about how media helps to share information regarding various developmental schemes such as Women's Helpline scheme, Ujjwala Yojana, Rashtriya Mahila Kosh, STEP, NAREGA and Skill Development schemes. Media's influence extends to helping women overcome the dominance of their male counterparts and facilitating the implementation of developmental plans in rural areas. The respondents also underscored how media is instrumental in cultivating awareness regarding various facets of empowerment, encompassing individual, social, political, and cultural empowerment.

In conclusion, this study emphasizes on exploring media's role in disseminating information regarding various schemes among women gram panchayat members of Tumkuru district and how it helps to shape their social and political life. In today's society, media is considered as an important tool for communication, for disseminating useful information and also for positive transformation of society. So it helps women representatives enabling them to play active roles in local governance and the decision-making process.
