Contents:

Reliability Optimization in the cutting area
Fatima Bahraoui, Hassan Makroum, Kamal Reklaoui

To Investigate the Relationship between Performance in Mathematics and Students’ Anxiety towards the Subject
Gunendra Chandra Das

A Study on Circular Motion and Its Applications

Quotient Labeling of Snake Related Graphs
P. Sumathi, A. Rathi

The impact of subsidy policy on export of latex industry in Thailand
Krisapon Kusolphalin

Solvability of a Class of Nonlinear Impulsive Volterra Integral Equations in Functional Analysis Course
Haiyong Qin

Applications of Operations Research in Oil and Gas Industry
Mobin Ahmad

Analysis for the fractional order hyperchaotic system with two parameters in teaching a circuit course
Haiyong Qin
