Contents:

1. Numerical Solution of a Multilane Fluid Dynamic Traffic Flow Model with Three Lanes
   Md. Shajib Ali and L. S. Andallah
   01-10

2. Regular \( \alpha \) Generalized Closed Set in Neutrosophic Topological Spaces
   Harshitha A and Jayanthi D
   11-18

3. Weakly Generalized Continuous Mappings in Neutrosophic Topological Spaces
   Abnaja S and Jayanthi D
   19-28

4. Experimental Evidences from Prisoner’s Dilemma and One Shot Games in Duopoly Markets in Bangladesh
   L. C. Das, J. Ferdous, S. Taher & W. Z. Loskor
   29-39

5. Some Paradigms on Principal Ideal Domain
   Dr. Behzad Parsin, Dr. Bashika Pervin
   40-43

6. \( m_\beta \)-Lacunary Statistical Convergence of Double Sequences of Order \( \alpha \) of Sets
   A. M. BRONO and A. G. K. ALI
   44-48

7. \( J_\beta \)- Statistical Convergence of Double Sequence of Order \( \alpha \) in Topological Groups
   A. M. BRONO and A. G. K. ALI
   49-54

8. On the Weyl group of \( \text{SO}(2n, \mathbb{C}) \)
   Yuan Saliu Abu-Shaga
   55-58

9. Characterization Theorem for Commutative Lattice Ordered Ring.
   R. Natu, S. Vijayakumar
   59-66

10. Universal Portfolios Generated by the Pseudo \( f \) - Divergences
    Choon Peng Tan, Kee Seng Kuang
    67-72

    Musa Aminu Iyapha, Jun Il Fhyi
    73-82
