Abstract: This study aims to describe the Management of Senior State High School Excellent Tapaktuan Regency of South Aceh. The research data was collected by observation, interview and document study. Data in the analysis through three levels namely: Data Description, Relationships Analysis and Withdrawal Conclusion. For the validity of data used triagulation technique. The results of this study reveal the findings are a) Strategies that have been applied in Senior State High School Excellent Tapaktuan that is by maximizing activities, planning, organizing, implementing and supervising have been going well. b) The process of applying management strategy in Senior State High School Excellent Tapaktuan through: i) The curriculum management is based on the National curriculum and supported by the local curriculum. 2) Student management is done from the beginning of admission of new students and for subsequent coaching. 3) Personnel management consists of educative and non-educative employees. 4) Management of facilities aimed at maximizing the procurement of funds and its use in order to support teaching and learning activities. 5) Financial management adheres to the provisions of the government as regulated under the RAPBS. 6) School relationship management with community is done through communication and meeting with parents. C) In conducting the management at Senior State High School Excellent Tapaktuan, South Aceh Regency, there is no significant problem considering the policy pursued based on the needs. While the supporting factor is more emphasized on the willingness and concern of all elements (principals, teachers, and employees) together to advance this school.

Keywords: Analysis of Quality Management Strategy Improving Superior Quality

Date of Submission: 13-09-2017 Date of acceptance: 28-09-2017

I. Introduction

One of the national ideals that must be fought by the nation of Indonesia is the effort to educate the nation through national education. The future of the nation and the superiority of our nation is determined by the superiority of human resources (human resources) it has. High quality human resources (human resources quality) is expected to be a significant development subject to more successfully manage resources for the benefit of the welfare of the community. In turn is the effort of this nation in realizing the Indonesian people as a whole through the implementation of educational equity distribution at every level of society. Implementation of national education can be achieved well, if the empowerment of human resources and non-human resources with the appropriate management strategy (the management strategy).

In South Aceh district there are several Senior State High School Excellent that try to handle smart students or who have high value such as: Senior State High School Excellent Tapaktuan, Senior State and High School Insan Madani. Senior State High School Excellent Tapaktuan is a superior high school from other high schools in the district of South Aceh. Senior State High School Excellent Tapaktuan was established in 2004, which is the result of deliberation between the educational leaders and the local government.

The success of Senior State High School Excellent Tapaktuan is certainly not separated from the influence of school management and teachers, students and school committee and non-educative employees. The author is interested in researching the implementation of quality improvement strategy in Senior State High School Excellent Tapaktuan is because with the existence of high school like this will increase the positive competition, especially high school in South Aceh district and generally Senior State High School in Indonesia in effort to optimize the quality of high school graduates between provinces. Besides the authors see the advantages of Senior State High School Excellent Tapaktuan as a problem that needs special attention, where there are many other high school has not done, although there are some schools that have facilities far more complete than Senior State High School Excellent Tapaktuan. The output produced every year in Senior State
High School Excellent Tapaktuan is increasing, this can be seen from the number of graduates of students who pass 100% as listed in the following table: Graduate Student Table from the academic year 2011/2012 Up to 2015/2016.

<table>

David said that Initially the term strategy used in the military world is defined as a means of using all military power to win a war. In the world of education, strategy is defined as a plan, method, or series of activities designed to archives a particular educational goal.[1] Thus, the learning strategy can be interpreted as planning that contains about a series of activities designed to achieve certain educational goals. Strategies are structured for Achieve certain goals. This means that the direction of all strategic planning decisions is the achievement of goals. Kemp explains that the learning strategy is a learning activity that must be done teachers and students for the purpose of learning can be achieved effectively and efficiently.[2] In line with the above opinion, Dick and Carey also mentioned that the learning strategy is a set of materials and learning procedures used together to generate student learning outcomes.[3] David said that Strategy definition is a way to achieve long-term goals. Business strategies may include geographical expansion, diversification, acquisition, product development, market penetration, employee rationalization, divestiture, liquidation and joint ventures.[1] Glueck and Jauch The definition of strategy is a unified, broad, and integrated plan that links the company's strategic advantage with environmental challenges, designed to ensure that the company's main objectives can be achieved through proper implementation by the organization.[4] In general, management activities exist within organizations that are directed to achieve organizational goals effectively and efficiently. George R. Terry explains "management is performance of conceiving and achieving desired results by means of group efforts consisting of utilizing human talent and resources".[5] It is understood that management is the ability to direct and achieve desired results with the aim of human efforts and other resources.

In order to achieve organizational goals effectively and efficiently, management must be fully functional in every organization, whether industrial organization, banking, or education. These management functions consist of planning, organizing, actuating, coordinating (coordinating) and controlling. At least these five functions are considered sufficient for managerial activities that will combine the utilization of human resources and material resources through cooperation to achieve organizational goals. Another opinion suggests four functions of management as proposed by George R. Terry which consists of these four fundamental functions of management are (1) planning (2) organizing (3) actuating (4) controlling”. In the management activities there are four functions, namely: planning, organizing, mobilizing and supervising.[5] Organizing is a second management function and a strategic step to realize an organizational plan. According to Winardi said
that organizing is a process whereby existing work is divided into manageable components and activities coordinate results achieved to achieve a particular goal.[6]

As the next step of managerial activity is directing. Koontz & O'Donnell suggests: "directing is the interpersonal aspect of managing by which subordinates are led to understand and contribute efficiently to the attainment of enterprise objectives, directing involves guiding and leading subordinates".[7]

In accordance with its basic understanding, an effective school means that schools have advantages, virtues, virtues when compared to others, so in this context superior schools contain the meaning of model schools that can be referred to as most other schools because of the advantages, virtues and the quality it has both academically and non academically. The Ministry of National Education has established a number of criteria that must be owned by superior schools. Includes:

First, the input (input) of students is selected strictly by using certain criteria and procedures that can be accounted for. The criteria are: (1) superior learning achievement with indicator of report card number, Pure Ebtanas score (NEM, now UN value), and academic achievement test result, (2) psychotest score including intelligence and creativity, (3) physical test, if needed.

Second, supporting facilities and infrastructures to meet students' learning needs and channel their interests and talents, both in curricular and extra curricular activities.

Third, a conducive learning environment for the development of the potential of excellence into a real advantage both physical and social-psychological environment.

Fourth, teachers and education personnel who handle must excel both in terms of mastery of subject matter, teaching methods, as well as commitment in carrying out the task. Therefore, additional incentives for teachers in the form of money and other facilities such as housing should be provided.

Fifth, the curriculum is trusted with the development and improvisation maximally in accordance with the demands of learners who have a higher learning speed compared with students his age.

Sixth, the learning period is longer than other schools. Therefore, there should be a dormitory to maximize coaching and accommodate students from various locations. In the dorm complex there needs to be a means that can channel the interests and talents of students such as libraries, sports equipment, arts and other necessary.

Seventh, the teaching and learning process must be of a quality and the results can be accountable to both students, institutions and society.

Eighth, superior schools not only provide benefits to students in the school, but must have social resonance to the surrounding environment. Ninth, the value of superior schools lies in the treatment beyond the national curriculum through curriculum development, enrichment and extension programs, remedial teaching, quality counseling and counseling services, creativity and discipline coaching.

II. Research Methodology

This research is conducted by using qualitative approach, it is based on the intention to describe the behavior of informants such as principals, vice principals, staff members, teachers and school committees in management activities in Senior State High School Excellent Tapaktuan South Aceh district according to the existing social situation. The qualitative research activities that will be carried out have characteristics as described by Bogdan and Biklen, namely: (a) the natural setting as the source of data (b) the researcher is the key instrument (c) qualitative research is more concerned with the process than the outcome (d) Researchers with a qualitative approach tend to analyze data inductively (e) the meanings of those behaviors that underlie their actions are essential aspects of qualitative education.

In interpreting the data on the meaning of informant behavior then used phenomenological interpretation with the pattern of intent, purpose and meaning.[8]

Every object studied qualitatively has a research background. To describe the actual social situation, it is necessary to determine the background of the study. The social situation of this research consists of principals: (1) principals, (2) vice principals (3), teachers (4), employees (5) and school committees. While the location of the actors perform activities, namely (1) schools, (2) administrative space (3), study groups (4), mosques / mosques and (5) library. The activities carried out by the actors consist of teaching activities, learning activities, administrative activities, lead activities, providing guidance, MGMP activities, school board activities, extracurricular activities, and worship activities. The subject of this research is directed to search data from school principals, vice principals, teachers, staff and school committees at Senior State High School Excellent Tapaktuan Regency of South Aceh. Data searching starts from the principal as a key informant using snow-ball sampling, then the next informant is determined based on the instructions of the principal. Data attainment will be discontinued when there is no more data variations appearing on the surface or experiencing saturation. So the number of informants of this study is not determined exactly depends on Required level of data required. Data collection in qualitative research using observation technique, in-depth interview and document review. Overall, researchers themselves plunge spaciousness as a key instrument (key instrument) in this study. As the
main instrument in this study, the researchers themselves who use some data collection techniques are:

1. **Observation**
   
The required data or informants are also collected by observation through direct observation at the research site either openly or veiled. In addition, from the observations made field notes that must be prepared after the observation and make contact with the subject under study. Because field notes in the form of data from observations the researcher must make a very comprehensive field notes.

2. **Interview**
   
   Interviews of informants as a source of data and information were conducted with the aim of extracting information about the research focus. In other words, more active (moderate) involvement is by trying to participate and engaging and trying to get closer to the principals. Interviews with informants as resource data and information were conducted with the aim of extracting information about the research focus. The researcher then puts forward the questions that have been structured if done formally and unstructured questions if done informally with principals either principals, vice principals, teachers or school committees. The question is to get data related to the focus and problem of research being studied.

3. **Document Study**
   
   Documents used to obtain information in this study are: announcements, instructions or rules, reports, decisions, and records. In qualitative research method, the researcher is the main instrument (key instrument).

   For that, all data is collected and interpreted by the researcher, but the documents related to the research focus. As humans, researchers become the main instruments with special characteristics or advantages. These advantages: (1) humans as instruments, will be more sensitive and faster able to react to stimuli from the environment that are expected to be meaningful or less meaningful for the study. Researchers as instruments react more quickly and interact with many factors in an ever-changing situation (2) the researcher as an instrument can adapt to various situations, and can collect various types of data at once (3) every situation is a whole and researchers as instruments can catch almost all situations and can understand all the details of the situation (4) a situation involving human interaction, can not be understood with only knowledge, but researchers often need feelings to live it. (5) the researcher as an instrument can immediately analyze the data obtained, so that it can directly interpret the meaning, to further be able to determine the observation direction (6) the researcher as an instrument can draw conclusions based on the data collected at a certain time and can immediately use it as reverse to obtain new information and finally (7) researchers as an instrument can receive and treat a distorted, even contradictory response to be used to enhance the level of trust and level of understanding of aspects studied. In qualitative research, the factor of data validity is also highly considered.

   The effort to create more credible process, interpretation and findings in this research is by (a) the long-standing engagement of the researcher with the investigation carried out unhurriedly so that the collection of data and information about the social situation and Focus of research will be obtained perfectly, (b) persistent observation (persistent observation). On the means of obtaining valid information, (c) perform triangulation, ie information obtained from multiple sources cross-examined and between interview data with observational data and documents (d) discussing with peers who did not participate in the research , So that the research will get input from others (e) negative case analysis that is analyzing and looking for cases or circumstances that disprove the research findings, so that there is no evidence that rejects the research findings (f) reference precision testing of the findings data and interpretation.

   Technique triangulation means that researchers use different data collection techniques to get data from the same source. Researchers use postitative observation, in-depth interviews, and documentation for the same data source, as can be seen in the picture below
Triangulation of sources means, to obtain data from different sources with the same technique, as seen in the picture below:

Triangulasai is a lot to do is checking on other sources. In this case, triangulation or cross-examination of data obtained can be done by comparing the interview data with observation data or document review related to the implementation of management strategy in Senior State High School Excellent Tapaktuan, South Aceh Regency.

Similarly, triangulation can be done by comparing data from various informants (data sources) related to interview data about the views, basic behaviors and values emerging from management strategies in Senior State High School Excellent Tapaktuan Kabupaten Aceh Selatan.

III. Result And Discussion

3.1. Research result

Management Leaders have established an Quality Policy of the Institute that is known and understood by all personnel of SMA Negeri Unggul South Aceh.

The above quality policy is built through five main pillars (5K), namely:

- Commitment
- Consistent
- Togetherness
- Conducive
- Excellence

As well as four working attitudes are adopted ie:

- Honest Job
- Employment Responsibiity
- Competent Work
- Done

Organizing is one of the management functions that need to get attention from the principal. This function needs to be done to realize the organizational structure of the school, job descriptions of each field, authority and responsibilities become clearer, and the determination of the necessary human and material resources.

As an important component of school organization, the principal must provide quality services. This is important in the current decentralization era of school principals as "The president in the multiversery is leader, educator, creator, innovator, wielder of power pump, he is also office holder, caretaker, inheritor, consensus seeker, persuader, bottleneck but he Is mostly mediator. With its independence, the principal is more empowered in developing programs according to his needs and potential. But in the implementation of the principal does not walk alone, but assisted by other components that are not less important."

Based on interviews with principals and administration as well as elements that exist in the arrangement of the chart above is:

a. Head of South Aceh Regency c/q Head of Education Office of South Aceh Regency serves as the organizer of Senior High School (SMA) and has the following duties and responsibilities:
   1) Preparing facilities for facilities and infrastructure for the implementation of education.
   2) Selecting educative personnel who will serve in the school.
   3) Assist finance for operational both technical and non technical activities.
   4) Advisors and advisors at the wheels of the organization of Senior State High School Excellent Tapaktuan Kabupaten Aceh Selatan work together.

Pay attention to duties and functions of local leaders c/q Head of Education Office is very visible that its existence in the organizational structure of Senior State High School Excellent Tapaktuan South Aceh district is based as a supervisor and supervisor for the wheels organization of Senior State High School Excellent
Tapaktuan Regency of South Aceh this, in addition it is also responsible for the provision of educative personnel. In this case the teacher required by Senior State High School Excellent Tapaktuan South Aceh district and also cooperate with related elements for the progress of this advanced educational institutions.

b. School Management, functions and responsibilities include the following:

1) Conducting school education for a certain period of time in accordance with the type, level and nature of the school.
2) Implement education and teaching in accordance with the applicable curriculum.
3) Fostering cooperation between school principals and teachers as well as relevant staff in the implementation of education.
4) Fostering cooperation with the community and related institutions.

School management in this case the organization of Senior State High School Excellent Tapaktuan South Aceh district directed at the organizational elements responsible for the implementation of education, conduct counseling teachers and staff and establish cooperation with elements outside the progress of the school.

The principal as an educational staff conducting school leadership activities has a major role in achieving educational goals in schools.

The principal's duties and responsibilities are to plan, organize, direct, coordinate, monitor and evaluate all school activities, including the areas of teaching and learning, office administration, student administration, employee administration, equipment administration, financial administration, library administration, Society. Principal, in this case served as educator, manager, administrator and supervisor. Head as educator in charge of conducting teaching and learning process effectively and efficiently. Furthermore, the principal as a manager has the following functions:

1) Develop a plan
2) Organizing activities
3) Monitoring
4) Evaluating activities
5) Hold a meeting
6) Make a decision
7) Organize the teaching and learning process
8) Set up administration
9) Administration, students, personnel, facilities and infrastructure, finance and RAPBS.
10) Organizing Student Organization Intra School (OSIS)

Regulate school relationships with communities and other relevant agencies.

3.2. Discussion

Description of duties and responsibilities of principals can be seen from two functions, namely the principal as an administrator and as a supervisor. The principal as an administrator at the school has the duty and responsibility for the entire managerial process that includes planning, organizing, mobilizing, and supervising the entire field of responsibility that is the responsibility of the school. The fields of management can cover the areas of personnel, students, administration, curriculum, finance, facilities and infrastructure, school and community relations and other supporting units. Meanwhile, the principal as a supervisor relates to service activities on improving the professionalism of teachers in order to achieve quality learning process.

The principal as administrator in charge of organizing the administration covering the following matters: Planning, Organizing, Supervision, Curriculum, Student, Administration, Labor, Office, Finance, Library, Laboratory, space skill / arts, counseling guidance, UKS, OSIS, Use, media, warehouse and 7K. Meanwhile, the principal as the supervisor is responsible for supervising the teaching and learning process, guidance and counseling activities, extra curricular activities, administration activities and cooperation activities with the community and related institutions, facilities and infrastructure, OSIS activities and 7 K activities.

Based on the above task description and the function of the headmaster above, it is seen that the presence of the headmaster in the organizational structure of Senior State High School Excellent Tapaktuan Regency of South Aceh district is based on planning, implementation, and supervision of teaching and learning activities and other technical and non technical elements involved in The achievement of the purpose of this teaching and learning activities, and based on interviews conducted by researchers in the field to the principal in performing these tasks and functions can delegate to the vice principal.

d. Deputy headmaster, assigned to assist the principal in the following activities:

1) Prepare planning, create program activities and program implementation.
2) Organizing, directing, manning, coordinating, monitoring, assessing, identifying and collecting data, and preparing reports.

Other tasks of the vice principal are:
3) Curriculum field, covering the following matters: preparation and elaboration of academic calendar, preparing the division of teacher tasks and lesson schedules, arranging the preparation of educational programs in terms of curriculum adjustments, curricular activities, and extracurricular activities, set the criteria program of class increase, criteria Graduation, and student progress reports and the distribution of report cards and diplomas, organizing improvement and teaching programs, managing the use of the environment and learning resources, regulating the development of the MGMP and
1) subject coordinator, arranging student mutations, administering academic supervision and organizing reports.
2) Student Affairs, covering the following matters: organizing group learning programs, organizing and coordinating the implementation of 7 K, organizing and fostering the activities of OSIS, Scouts, PMR / Youth Scientific Group, UKS, and Paskibra, arranging lightning boarding program (Bina Mental ) Organize and follow the execution of student exemplary school selection, organize intelligent scrutiny, sport achievement, and selecting prospective students to be proposed to get a scholarship.
3) Facilities and Infrastructure, covering the following matters: planning of facilities / infrastructure to support the KBM process, planning the program, arranging the utilization of facilities and infrastructure, managing maintenance, repair and filling, bookkeeping arrangements and reporting.
4) Field Relations with the Community, covering the following matters: arranging and developing relationships with school committees, organizing social services, field trips, organizing exhibitions of educational outcomes (gebyar student achievement), and preparing reports.

State of Teachers and Administrative Staff

The existence of teachers is an important component in determining teaching and learning activities to achieve educational goals.
