

**Contents :**

Effect of Payment delay on Time performance of Construction Projects in Edo State, Nigeria	01-06
Techniques for strengthening, suppressing delamination, and preventing delamination formation during the drilling of CFRP composites	07-15
Intelligent Missile Controller for Maneuverable Target	16-26
Research on Calculation Method of Basket of High-rise Building Rescue System	27-33
Performance Evaluation of Water Chiller Using R1234yf/R134a Blend	34-42
Experimental Studies on Concrete Utilizing Red Mud as a Partial Replacement of Cement with Hydrated Lime	43-49
Vibration Based Damage Detection using Localized Crack-type Damage Models and ANN	50-66
Comparison of Port and Sequential injection in CNG operated engine to find the most efficient injection system on basis of different parameters	67-71
